multi-level marketing business. I developed multiple strategies for different marketing scenarios. it was a free app based on open-source projects like "tsfr" and "react-native-todoList-boilerplate":

<https://customermanager-1.web.app/>

Bime—insurance website [publishDate:2019]

a rebuild of an insurance/marketing website with a lot of recursive user management

<http://abmp.rf.gd/bime/>

TrafficCounter— [publishDate:2018]

TrafficCounter was a android(Rn) app as a gui for a traffic counting hardware team of Atinet company

Tracker—gps tracking platform [publishDate:2017]

Tracker was a full feature tracking platform with support for almost all of popular tracking devices like:

Coban models, Teltonika , and other hardwares

but i also wrote a middleware specially for our hardware team customized device. I wrote this project with angular and google maps but later had to rewrite it with React and OpenStreetMap because of Google sanctions on Iran.

SmartTaxi—online taxi [publishDate:2016]

SmartTaxi was an online taxi app(uber-like) .

i developed this for multiple platforms and classes :

- a Android for Driver
- a Android for Passenger
- a web cms for Managers/admins/ Operators/Agencies

<https://powerful-bayou-65212.herokuapp.com/demo/>

Danabina—shopping website [publishDate:2013]

Danabina shop was a online shopping website

based on "mvA" (my micro framework based on MVC system to connect angular1 to php)

<http://abmp.rf.gd/shop/>

ABMP—Mehr Parsian company website [publishDate:2011]

abmp was a company website(In the field of school services) .

Even though it was my first professional project and it was based on Joomla , we had a country-level job application.

also things like payments, etc...
